

§ 360.101 Steel import licensing system.

(a) *In general.* (1) The steel import licensing system includes both the on-line registration system and the automatic steel import license issuance system. All imports of steel products listed in the President's March 5, 2002, section 201 relief determination, including those products subject to country exemptions or product exclusions, are subject to the import licensing requirements. Information gathered from these licenses will be used to ensure that the purpose of the 201 relief is not undermined, with certain aggregate information reported publicly under the surge monitoring program. An inter-agency group will assist USTR with the analysis of the data collected beyond the data posted on the surge monitoring program.

(2) A single license may cover multiple products as long as certain information on the license (*e.g.*, importer, exporter, manufacturer and country of origin) remains the same. However, separate licenses for steel entered under a single entry will be required if the information differs. As a result, a single Customs entry may require more than one steel import license. The applicable license(s) must cover the total quantity of steel entered and should cover the same information provided on the Customs entry summary.

(b) *Entries for consumption.* All entries for consumption of covered steel products, other than the exception for "informal entries" listed in paragraph (d) of this section, will require an import license prior to the filing of Customs entry summary documents. The license number(s) must be reported on the entry summary (Customs Form 7501) at the time of filing. There is no requirement to present physical copies of the license forms at the time of entry summary; however, copies must be maintained in accordance with Customs' normal requirements. Entry summaries submitted without the required license number(s) will be considered incomplete and will be subject to liquidated damages for violation of the bond condition requiring timely completion of entry.

(c) *Foreign Trade Zone entries.* All shipments of covered steel products

into FTZs, known as FTZ admissions, will require an import license prior to the filing of FTZ admission documents. The license number(s) must be reported on the application for FTZ admission and/or status designation (Customs form 214) at the time of filing. There is no requirement to present physical copies of the license forms at the time of FTZ admission; however, copies must be maintained in accordance with Customs' normal requirements. FTZ admission documents submitted without the required license number(s) will not be considered complete and will be subject to liquidated damages for violation of the bond condition requiring timely completion of admission. A further steel license will not be required for shipments from zones into the commerce of the United States.

(d) *Informal entries.* No import license shall be required on informal entries of covered steel products, such as merchandise valued at less than \$2,000. This exemption applies to informal entries only, imports of steel valued at less than \$2,000 that are part of a formal entry will require a license. For additional information, refer to 19 CFR 143.21 through 143.28.

(e) *Other non-consumption entries.* Import licenses are not required on temporary importation bond (TIB) entries, transportation and exportation (T&E) entries or entries into a bonded warehouse. Covered steel products withdrawn for consumption from a bonded warehouse will require a license at the entry summary.

§ 360.102 Online registration.

(a) *In general.* (1) Any importer, importing company, customs broker or importer's agent with a U.S. street address may register and obtain the user identification number necessary to log on to the automatic steel import license issuance system. Foreign companies may obtain a user identification number if they have a U.S. address through which they may be reached; PO boxes will not be accepted. A user identification will be issued within two business days. Companies will be able to register online through the import licensing and monitoring Web site. However, should a company prefer to apply for a user identification number
